

Ed.Square Town Centre SENSORY MAP

Sensory Areas

- 
Lower Sensory
 An area where there are some sensory inputs but these are not overpowering or competing. Not likely to cause overwhelm.

- 
Medium Sensory
 An area with moderate levels of sensory input. There may be competing sensory inputs. These zones indicate the need for some strategies and have an increased chance of leading to overwhelm.

- 
Higher Sensory
 An area with heightened sensory input or with multiple overlapping / competing sensory inputs simultaneously. Requires the need for coping strategies and has a high likelihood of leading to overwhelm.
